

Haileybury Turnford Homework Information

All homework for Year 7 through to Year 13 is logged using our online system www.classcharts.com.

If you have any questions about homework tasks, please use the email contact information on our school website to raise queries with the relevant subject teacher.

At Haileybury Turnford, meaningful homework tasks are a really important part of our curriculum, and we have used current research from the Education Endowment Fund and other sources such as SecEd to inform the types of tasks we ask our students to complete. Homework fosters independent learning and motivates students to love learning.

We know that tasks focused on retrieval of knowledge and practice are beneficial at KS3 and KS4. As students become more expert learners at KS4 and KS5, homework will also include more preparation and research-based tasks. At KS4 and KS5 homework may also include the completion of coursework for student's chosen qualifications.

The types of tasks that might be set are:

- Quizzes
- Reading and comprehension questions
- Key vocabulary tasks
- Exam practice questions
- Instrumental practice and rehearsal
- Research and pre-reading (mostly KS4 and KS5)

Homework is best completed in short bursts of 20-30 minutes in a suitable space. We have spaces at school where IT can be used as well as quiet settings. Please use the email contact information on our school website to speak to your child's pastoral leaders about completing homework at school.

KS3 Homework

Weekly Homework	English Maths Science Spanish
Fortnightly Homework	Geography History
Half Termly Homework Projects	Computing D&T Engineering Food Technology

KS4 Homework
